for kids

Speech, Language & Hearing School Screenings

www.spotontherapykids.com

Clinicians performing the screenings have a Master's Degree in Speech-Language Pathology and are ASHA certified and licensed by the state of Georgia.

SPOT On Therapy for Kids, formerly I-Xcel, is dedicated to providing the best diagnostic and therapeutic services for children with speech and language-based learning difficulties.

SPOT On Therapy for Kids believes in a team approach by collaborating closely with parents, teachers, administrators, physicians, psychologists, and audiologists to create a cohesive treatment approach for your child.

Please call us today to schedule your on-site school screenings! Liz Krupit, owner: (678) 644-0819

SPOT On helps children realize their full potential in academic and social settings by improving speech, language, learning, and processing skills.

SPEECH SCREENING will assess your child's articulation of sounds, voice quality, and the fluency of speech.

LANGUAGE SCREENING will briefly assess your child's comprehension and ability to use age appropriate language and vocabulary.

HEARING SCREENING will assess appropriate hearing bilaterally as judged by pure tone audiometric testing. Hearing is only screened in children over age 3.

Screening results and recommendations will be sent home with your child within 2 weeks of testing. Screening may include brief consultation with teacher.
